

LAB EXPERIMENT 04

TOTAL NUMBER OF CHARACTERS USING RAPTOR

TO DO:

The string is a sequence of characters placed in double quotes (" "). Performing different operations on string data is called String Handling. Strings are immutable. Whenever a change to a String is made, an entirely new String is created. If we want to store a group of characters we can use a char array. String provides various methods to perform different operations on strings. Using Raptor draw a flowchart to display the total number of characters in the string and returns it.

OUTPUT :
